NEIGHBORHOOD PETITION OF SUPPORT to include:
(LPNA – LONE OAK STREET)

In the City of Madison's NEIGHBORHOOD TRAFFIC MANAGEMENT PROGRAM

Representatives of your neighborhood have requested the City Traffic Engineering Division to consider Neighborhood Traffic Management on your street. *To be considered and* **begin** *the process* *a majority of households and businesses within the petition area* need to indicate their interest via this petition. By signing this form you are indicating your support and formally requesting to participate in the City of Madison's **Neighborhood Traffic Management Program** and understand that;

* The NTMP relies upon the use of physical devices such as; *islands*, *traffic circles*, and *speed humps* etc. to control the negative behavior of traffic and improve neighborhood livability.

* The program requires a show of *resident support to be considered* for potential funding and *does not guarantee* a street will make the project list.

* Since resources for these projects are limited a *ranking system* has been developed. If there is enough support to continue, your street will be ranked based upon the following criteria: Traffic Volume, % of Traffic Traveling 5mph over the Posted Speed Limit, Crashes, School Area, Pedestrian Area, School Walk Route, Bike Route.

* If a street does receive funding and makes it to the *project phase*, the *City will present the neighborhood with a concept* to install NTMP devices at locations based upon neighborhood input and engineering principles.

* A final *confidential survey* will be sent out to a defined "survey area" based upon the affected area of the device/s being proposed. *Permanent construction* of a NTMP device requires that *60% of the returned surveys* support that device/s.

If you have questions regarding this petition or the Neighborhood Traffic Management Program, please contact Tom Mohr at 267-8725, or see Traffic Engineering's web page at http://www.cityofmadison.com/trafficEngineering/programsTraffic.cfm .
